Product Data Sheet

Engine Flush Oil

DESCRIPTION

Maverick Moto Power Engine Flush Oil is designed to strip away internal contamination within the engine. It targets sludge, varnish, lacquer, and carbon deposits to unclog and clear the engine to allow fresh oil to stay clean and enhance the lubrication of vital engine components.

PERFORMANCE BENEFITS

- Restores oil flow
- Keeps new oil clean
- Removes sludge, varnish and lacquer, and carbon deposits
- Does not attack common sealing materials
- Restores engine power and fuel efficiency

PRODUCT APPLICATION

Maverick Moto Power Engine Flush Oil strips and cleans the oil circuits of motorcycles with 4-stroke gasoline engines. For product treatment, 2.7 oz. (80 mL) of **Maverick Moto Power Engine Flush Oil** is suitable for 1 – 2 liters of oil.

Add **Maverick Moto Power Engine Flush Oil** to warm motor oil prior to oil change. Once added, leave engine to idle for 10 – 15 minutes. Do not drive the motorcycle during this time. For manual transmissions, press the clutch level and hold for a few seconds several times. After the allotted idle period, turn off the engine, drain the old oil, and complete the oil and filter change.

Maverick Moto Power Engine Flush Oil is compatible with commercially available motor oils and suitable for use on motorcycles with wet clutches.

Always consult original equipment manufacturer's lubricant recommendation for proper fluid application.
